SOLUTIONS FOR PAINTS AND VARNISHES

The ideal solution for powder paints and varnishes

The production of powder paints and varnishes is one of the many chemical applications in which efficient mixing is not only necessary but critical.

The KBC range of mixers, specifically configured, is the ideal solution to thoroughly and quickly mix paint powders: robust, usually in stainless steel (304 or 316), with one or more electro-pneumatically actuated discharges with a trap door perfectly flush with the mixing drum, these units achieve a perfectly homogeneous mix in a very short time.

With plough tools and scrapers, the addition of side refiners to speed up mixing operations and properly distribute pigments included in the recipes, KBC mixers have an excellent return on investment, thanks to their robust construction, their virtually maintenance-free design and easy-to-clean configuration (by means of the large frontal inspection doors that guarantee a full, comfortable access to all areas inside the drum).

Depending on layout and specific installation constraints, a vast range of accessories is available to perfectly complete the unit's configuration.

KB mixers: the ultimate mixing solution!

Standard units

Model	Max. volume	Max. weight*	Power (kW)
KBC 400	425 l.	425 kg	11 / 15
KBC 750	840 l.	840 kg	22 / 30
KBC 1300	1,405 l.	1,405 kg	30 / 37
KBC 1700	1,750 l.	1,750 kg	37 / 45
KBC 2000	2,160 l.	2,160 kg	45 / 55

* considering an average bulk density of 1.0 kg/dm³
