

## **KBA MIXERS**

SOLUTIONS FOR THE PHARMA AND COSMETIC INDUSTRY

## The ideal solution for pharmaceuticals and cosmetics

The KBA range of industrial mixers specifically configured to handle pharma and cosmetic ingredients represents the ideal solution for highly specialized, niche productions as well as large-scale automated production lines.

Usually manufactured entirely in 316 stainless steel, with a robust, industrial build, these units are the perfect solution to all contamination and sanitation problems, highly critical in the pharmaceutical and cosmetic industries.

KBA high-turbulence mixers come with an absolute discharge, even better performing than the total bomb door solution used for KBT models: they are equipped with a 60° large door stretching across the entire length of the mixing drum, from end plate to end plate, avoiding any product build-up inside the drum, guaranteeing a complete discharge (residue <0,1%). Thanks to the blade-type tools directly welded to the shaft and the highest possible level of finishing (mirror polishing), no product whatsoever is left inside the drum, making cleaning operations extremely quick and perfectly efficient.

With a very low mixing time and the highest degree of product homogeneity, these mixers are the best solution to achieve top quality finished products in the cosmetic and pharmaceutical sectors.

### KBA mixers: the ultimate mixing solution!

#### Standard models

Model	Max. volume	Max. weight *	Power (kW)
KBA 100	105 l.	50 kg	4.0
KBA 150	150 l.	75 kg	5.5
KBA 250	245 l.	120 kg	7.5
KBA 400	430 l.	215 kg	9.2
KBA 600	650 l.	325 kg	11.0
KBA 750	840 l.	420 kg	15.0
KBA 1300	1,405 l.	700 kg	22.0

\* considering an average bulk density of 0.5 kg/dm<sup>3</sup>
